 SPAN AND REACH ~

Ms. Lyman is a woman who is unwaveringly positive, in all things, and infinitely spiritual.

*It is in the earth and the heavens that she finds the sources of her work... She likes to see how the two come together, assemble, group and all the while stretch, jump and rush toward a world that is in constant growth...*

# Worlds of Inspiration

*lindy lyman*

Galerie Quint-Essences  
 June 1 to June 28, 2013

Rue du Neubourg 20  
 2000 Neuchâtel, Switzerland

For Lindy, ARTISTS ARE : “ THE SEERS THE SHAKERS THE SHAMANS & THE SHAPERS.”  
Her inspiration is drawn not only from one world, but from all the worlds perceived by all our senses, as well as our spiritual aspects. . .

In the Denver, CO studio, Lindy plays with both various art forms and music, which seem to go hand in hand... she has a lovely soprano voice and we sincerely hope she will grant us a few of the 60s folk songs we sang while she is here...

In high school she played the guitar and sang in a small group called the « A propos » - she and I were in the same group together—often a capella!

We have been friends for a very

long time, for well over 40 years in fact, but the beauty of Lindy’s works still surprises and overwhelms me. She is an artist deep in her soul and all the mysterious and mystical facets of the world where curiosity and joy, as well as a feeling of wonder, nearly childlike and naive, encourage her to continuously seek new ways to express her « joie de vie. » Touch the sky and plant her toes like roots in the earth—these are the beautiful goals of an artist who sees and lives the beauty of the world each day, and feels it deeply. Her generosity in sharing it with us is also constant and boundless. Such a gift is precious. Open your hearts and admire this culture of love and beauty...

« Art is a way to show our reverence for life...

With paint, canvas, paper, water-soluble media, found objects, sounds and music... I love to dance with the forces of nature in their life spiral, at the moment they burst with energy or, on the contrary, when they form a mass that absorbs or reflects light...

I see painting as a microcosm of all creation, a reverential relationship that, at the moment of creation shows, water, earth, air and fire in layers, in cycles, in fields and waves of energy that contain both chaos and the reverberations of a vast space, or even the void that suddenly is animated...

I try to fuse both ancient and post modern sources into a vision that will awaken, cleanse, bring calm and heal, while at the same time create a new knowledge and deeper awareness of the life that surrounds us... »
